Procedure Manual for BSE Surveillance	
Introduction	1
Purpose	1
Surveillance Plan Overview	3
Sampling the Targeted High-Risk Cattle for BSE	5
Definition – Targeted Cattle Population	5
Clinical Presentation Criteria	5
Collection sites	6
Cattle condemned on antemortem inspection at slaughter	6
Sampling Apparently Normal Aged Animals Presented for Slaughter	7
Procedures for Obtaining and Submitting Samples from Targeted High-Risk and Apparently Normal Cattle	8
Personal Safety	10
Detailed Sampling Procedures	11
Tools needed	11
Getting a Sample of Sufficient Quality	12
BSE sampling using a spoon	12
Shipping the Sample	19
Packaging Materials	19
Packing and Shipping	19
Designated Laboratories for BSE Sample Submission	21
Proper Communication for Submitting Samples	23
Disposal	25
Appendix A: Veterinary Services Memorandum NO. 580.16 – Procedures for Investigations and Surveillance of Targeted Cattle for Bovine Spongiform Encephalopathy (BSE)	
Purpose	A1
Cancellation	A1
FAD Investigation of Cattle Highly Suspicious for BSE	A1
Criteria for identifying an animal that is highly suspicious for BSE	A2
Sample collection and submission for cattle that are highly suspicious for BSE	A2
Sampling Targeted High-Risk Cattle for Surveillance	A3
Definition – Targeted Cattle Population	A4
Clinical Presentation Criteria	A4
Cattle condemned on antemortem inspection at slaughter	A4
Collection sites	A5
Random Samples for Apparently Normal Aged Animals Presented for Slaughter	A5
Sampling and Submission Procedures for Targeted Surveillance Samples and Apparently Normal Samples	A5
Cost Recovery Payments	A6
Communication and Reporting of Test Results	A7
Disposal	A9
Attachment I – Personal Safety	A10
Attachment II – Designated Laboratories	A11

Appendix B: BSE Surveillance Plan	
Targeted High-Risk Population Sampling Plan	B1
Surveillance Objective	B1
High-Risk Population Estimates	B1
Definition – Targeted Cattle Population	B2
Clinical Presentation Criteria	B2
Cattle Condemned on Antemortem Inspection at Slaughter	B3
Laboratory Capacity and Testing of Samples for BSE from Targeted Cattle	B3
Sample Collection for Targeted Cattle	B4
Data collection and sample identification	B6
Cost Recovery and Participation	B6
Collection Methods and Sites	B6
BSE Sampling Communication Plan	B8
Disposal	B9
Education and Outreach	B9
Additional Sampling Plan for Clinically Normal Aged Cattle	B9
Surveillance Objective	B9
Population Estimates and Distribution of Clinically Normal Adult	
Slaughter Cattle	B9
Sample Collection for Clinically Normal Aged Slaughter Cattle	B10
BSE Education, Training, and Outreach Matrix	B11
Appendix C: State-level Surveillance Plan Templates	
Introduction	C1
State Surveillance Plan Sample	C2
Background	C2
Plan	C2
Budget	C5
Collection Site Cost Information	C7
Estimated Personnel Needs.....	C8
Additional Cost Information	C9
Appendix D: Sampling Job Aid	
Sampling Summary	D1
Appendix E: Taking a Quality Sample	
Taking a Quality Sample	E1
Appendix F: AVIC Directory	
AVIC Directory	F1
Appendix G: Forms	
Filling Out the Paper Forms	G1
General	G1
Completion of the paper USDA BSE Surveillance Submission Form	G1
Completion of the paper USDA BSE Surveillance Data Collection Form.....	G3
Comparison of differences between current data entry screens and revised BSE submission and data collection forms.....	G5
Attachment A: USDA BSE Surveillance Submission Form.....	G8
Attachment B: USDA BSE Surveillance Data Collection Form	G9
Quick Start Guide – BSE Lab Submission Webpage.....	G10

Quick Overview	G10
Steps to Creating a New 10-4 Lab Submission	G11
What Role am I?.....	G12
Logging In	G12
The BSE Inbox	G14
Creating a Sample Submission	G15
Adding Samples	G18
Adding Animal ID's	G20
Printing 10-4 and Supplemental Forms.....	G20
Entering Laboratory Test Results.....	G21
Key points to remember	G21
Troubleshooting and support	G21
Attachment C: User Roles	G22
 Appendix H: Barcodes	
Barcodes	H1
 Appendix I: Determining the Age of the Cattle	
Uniform Aging for BSE Sampled Animals	I1
Sketches of Uniform Aging for BSE Sampled Animals	I3
 Appendix J: Background on BSE	
Background on BSE	J1
Clinical Signs of BSE in Cattle	J1
How BSE Is Currently Diagnosed	J1
Similar Diseases of Humans and Other Animals	J2
BSE and vCJD – Human Health Concerns	J2
Where has vCJD been Detected?	J3
Transmission of BSE	J3
 Appendix K: FSIS Documents	
FSIS Notice 28-04	K1
FSIS Notice 29-04: Questions and Answers for FSIS Notice 28-04	K8
USDA Memorandum from the Administrators	K14
FSIS Notice 33-04.....	K16
FSIS Notice 40-04	K19
 Appendix L: Outreach Materials	
BSE Factsheet	L1
BSE Q's and A's	L3
 Appendix M: Veterinary Services Memorandum NO. 580.4 – Procedures for	
Investigating a Suspected Foreign Animal Disease/Emerging Disease Incident	
(FAD/EDI)	
Purpose	M1
Cancellation	M1
General	M1
Specific Instructions	M1
Investigation procedures	M1
Reporting and notification procedures	M3
Case diagnosis	M5

Case closure	M5
Inquiry	M6
Attachment I: Emergency Programs' Contact Information	M7
Attachment II: Emergency Management Response System FAD/EDI Investigation Reporting Instructions	M8
Attachment III: FAD/EDI Diagnostic Specimen Priority Designation and Submission Procedures	M10
Attachment IV: FAD/EDI Specimen Shipping Information to FADDL	M15
